SPECIALTY CATALOGUE

AND

OFFICIAL PRICE LIST

OF

Sash, Doors, Blinds, Mouldings

AND

ALL KINDS OF MILLWORK.

ADOPTED AND EFFECTIVE
OCTOBER, 15, 1903,

By the Wholesale Sash, Door and Blind Association of the Northwest.

CHICAGO :
SHATTOCK & MCKAY,
PRINTERS.

OFFICIAL GRADES SASH, DOORS and BLINDS.

Adopted by the Wholesale Sash, Door and Blind
Manufacturers' Association of the Northwest.

DOORS.

AAA. Oil Finish Doors.—Material for AAA. Oil Finish Doors must be Clear, no white sap admitted. Workmanship must be good.

AA. Oil Finish Doors.—Material for AA. Oil Finish Doors must be Clear, with the exception that white sap will be admitted, not to exceed twenty-five (25) per cent of the face of any one piece. Workmanship must be good.

A. Doors.—Material in A. Doors must be Clear, with the exception that water stains and small pin knots not exceeding one-fourth ($\frac{1}{4}$) inch in diameter may be admitted. No piece to contain more than two (2) such defects and no door more than five (5) such defects on each side; white sap not considered a defect. Workmanship must be good.

B. Doors.—Material in B. Doors may contain knots not to exceed one (1) inch in diameter, and blue sap showing on both sides not to exceed fifty (50) per cent in any one piece of the door and gum spots showing on one (1) side of a piece only and other slight defects, shall not exceed ten (10) in number on each side and each white pine stile, bottom and lock rail must contain at least one (1) and not to exceed three (3) such defects; plugs admitted and not regarded as a defect. Slight defects in workmanship admitted.

C. Doors.—Material in C. Doors may contain all stained sap and small worm holes and fine shake; also knots not exceeding one and three-fourths ($1\frac{3}{4}$) inches in diameter. Twenty (20) defects may be allowed on each side, also slight defects in workmanship. Each piece of white Pine in a No. C Door must contain a defect. Not more than six (6) defects allowed in any one piece.

D. Doors.—D Doors are regarded as a cull door and must contain large coarse knots and may contain rot, worm holes, shake and other serious defects.

A Standard Door may be through tennon, blind tennon or dowelled.

WINDOWS.

Check Rail Windows may contain two (2) knots three-eighths ($\frac{3}{8}$) inch in diameter or one red knot five-eighths ($\frac{5}{8}$) inch in diameter in each piece of a window. White sap and not over thirty-three and one-third ($33\frac{1}{3}$) per cent blue sap may be admitted in any one window. Workmanship must be good.

Plain Rail Windows and Sash may contain blue sap and small knots.

BLINDS.

No. 1. Outside Blinds must be made of Clear lumber, except that small, sound pin knots, water stain and white sap may be admitted. Workmanship must be good.

WOODS ADMISSIBLE.

Woods other than Michigan, Wisconsin and Minnesota White Pine admitted in Doors, Blinds and Windows, except in Oil Finish Goods.

DIRECTIONS FOR ORDERING.

Much valuable time can be saved in closely following these instructions. Be explicit; do not assume that we know what is needed.

Unless otherwise specified, or covered by standing instructions to the contrary, we will understand all orders as calling for **Regular Western Styles of Goods**, as described in this Catalogue.

The universal rule in ordering millwork is to give the width first then the height.

WINDOWS AND SASH.

1. The term Sash indicates a single piece.
2. The term Window means two pieces, an upper and a lower Sash, made with either plain or check rail.
3. In ordering regular sizes of Sash or Windows, give size of glass and number of lights and thickness; if a Window, whether check or plain rail; state whether open or glazed, and if glazed, whether with single or double strength glass.
4. In ordering odd sizes, give size of opening to be filled and describe as above.
5. When measurements are given in inches, it usually indicates the glass size, and we will so understand it; when given in feet and inches the outside measure or opening is understood.
6. In ordering Segment or Circle Head Sash and Windows, give the number of style desired (see page 5) and the radius of Circle of Segment. If no number or proper description is given in ordering, we will substitute for Circle Head Style No. 2, and for Segment Head Style No. 4, using our regular radius, which is the width of the Sash for Segment Heads and one-half the width of Sash for Circle Heads.

DOORS.

7. In ordering always give width, height, thickness, number of panels and quality. If full instructions are not given, to save time in shipment, we

DIRECTIONS FOR ORDERING.

CONTINUED.

assume that our Standard Door, 1 $\frac{3}{4}$ inch, Four Panel O G, A quality is desired, and will fill orders accordingly.

8. If other than Four Panel O G Doors are required, for Panel Doors, give number and arrangement of panels and Style of Sticking; for Sash Doors give number of style desired; indicate whether open or glazed, and if glazed, style of glazing.

9. Where Moulded Doors are required, state whether flush or raised moulded is desired, and if to be moulded on one or two sides.

BLINDS.

In ordering, specify whether Outside (O. S.) or Inside (I. S.) are wanted.

10. **OUTSIDE BLINDS.** In ordering Outside Blinds, if regular, give size of glass and number of lights in window for which they are intended, and size of opening to be filled, if odd; give thickness and state if rolling slats (R. S.), stationary slats (S. S.), or half rolling and half stationary slats ($\frac{1}{2}$ R. S., $\frac{1}{2}$ S. S.), are required. If other than these styles are required, order must so state.

11. The regular opening for Outside Blinds is one (1) inch longer than the Check Rail Windows of corresponding glass size. Where Blinds of extra length for brick buildings are desired, order must so state and Blinds will then be made two (2) inches longer than sash opening.

12. Our Standard Blinds are 1 $\frac{1}{8}$ inch thick, full rolling slats, made for regular openings, as above described. When not otherwise specified we assume this to be the style desired, and fill orders accordingly.

13. **INSIDE BLINDS.** In ordering it is best to give exact outside measure of opening to be filled. Give thickness, number of folds and state if all panels, all slats or half panel and half slats.

CIRCLE and SEGMENT TOP WINDOWS

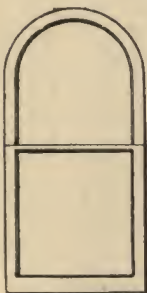

Fig. 1.

Circle inside and
outside.

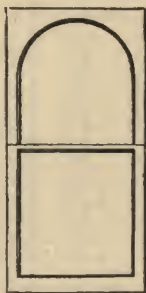

Fig. 2.

Circle outside, square
inside.

Fig. 3.

Fig. 4.

The above windows can be filled with any number of lights required. Always give radius of segment, otherwise they will be made regular radius, which is width of window.

All check rail windows plowed and bored.
For sash extras see pages 27 to 33.

Bent or Swell Face Windows.

For Square Head Open Sash or Windows Bent or Swell Face add to net price of Sash of same size or thickness, as follows: For sash or windows 3 ft. 4 in. wide or under if radius is 8 feet or less for single one light sash \$1.50 net; for two-light windows \$3.00 net. For sash or windows wider than 3 ft. 4 in. and not wider than 6 ft. for single one-light sash add \$2.00 net, and for two-light windows \$4.00 net. If radius is greater than 8 ft. deduct 20 per cent from above figures.

5-10	64	2.97	36.85

For Open Transom No. 90, Front Sash, 1¾ inch thick, add \$1.50 to price of a one light Open Transom of same size. If glazed with plain glass, add \$2.00 to price of a one light Transom of same size glazed with plain glass.

For Open Transom No. 97, Front Sash, 1¾ inch thick, add \$1.20 to price of a one light Open Transom of same size. If glazed with plain glass, add \$1.60 to price of a one light Transom of same size glazed with plain glass.

If Transoms No. 90 and No. 97 are glazed with White Chipped, Enameled or Colored glass (any color except Ruby) add 40 cents per square foot of glass measure to glazed list. If Ruby, add 70c. list per sq. ft. to glazed list.

For prices of 1¾-inch sash, see sash extras Nos. 95 and 96, page 33.

SASH EXTRAS.

NOTE—(a). The term "stock quantities," whenever used in this list, means 5 or more Doors, and 1 or more Windows, Sash or Blinds, of one size, kind and quality.

NOTE—(b). Irregular and intermediate sizes, in stock quantities, same list as next larger listed size, both open and glazed. For less than stock quantities on sizes not listed, an extra 10 per cent will be charged.

NOTE—(c). Where no provision is made for price on quantities less than 10, use stock quantity price and add 10 per cent to the amount thus created.

LAWN SWINGS.

THE "ECONOMY" LAWN SWING.

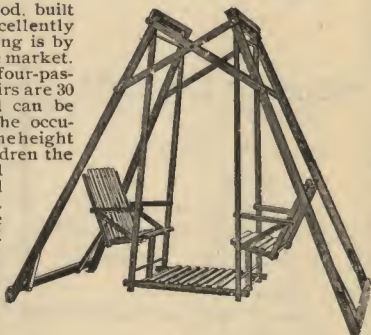

ECONOMY.

This Swing is made from selected material, is well proportioned, strong and durable. It is built both two and four-passenger and has the adjustable foot-board feature. The frame is painted a bright vermilion, balance of the Swing natural wood finish; the entire Swing varnished, giving an excellent finish. The Swing is over 8 feet high and is an ornament to any lawn. It is designed to meet the demand for a

good Swing at a moderate price. Each Swing is crated separately for shipment, and put together ready for use.

THE "SECURITY" LAWN SWING.

Made of hardwood, built strong, and excellently finished, this Swing is by far the best on the market. It is built only four-passenger. The chairs are 30 inches wide, and can be inclined to suit the occupants. To adapt the height of the seat to children the foot rest is placed on second round from the bottom. By elevating the foot rest to a level with the seat, the swing can be used as a hammock. The Swing occupies a ground space of 6x9 feet. The corner posts to the frame are

SECURITY.

8 feet 11 inches long, made from 2-inch stock, all securely bolted. The frame, the arm rests and the foot rest rails are painted a bright vermilion, the balance natural wood finish, and the whole of it protected with a good coat of varnish.

APPLY FOR PRICES.

THE "SIMPLEX" GLIDING SETTEE.

COMBINED PORCH AND LAWN SWING.

**Simplex.**

THE LATEST THING OUT.

Our "**Simplex**" Gliding Settee has overcome many of the unpleasant and objectionable features of the old style swing. Its movement is a simple gliding motion which does not cause that dizzy sensation experienced by the dipping swing of the regular styles.

It is well made of choice and thoroughly seasoned lumber. The base and footboards are painted a bright red and the remainder of the settee is nicely finished in natural wood. By removing the center section of the footboard, turning its upper side downward, and placing it between the seats, it assumes a most restful and inviting shape.

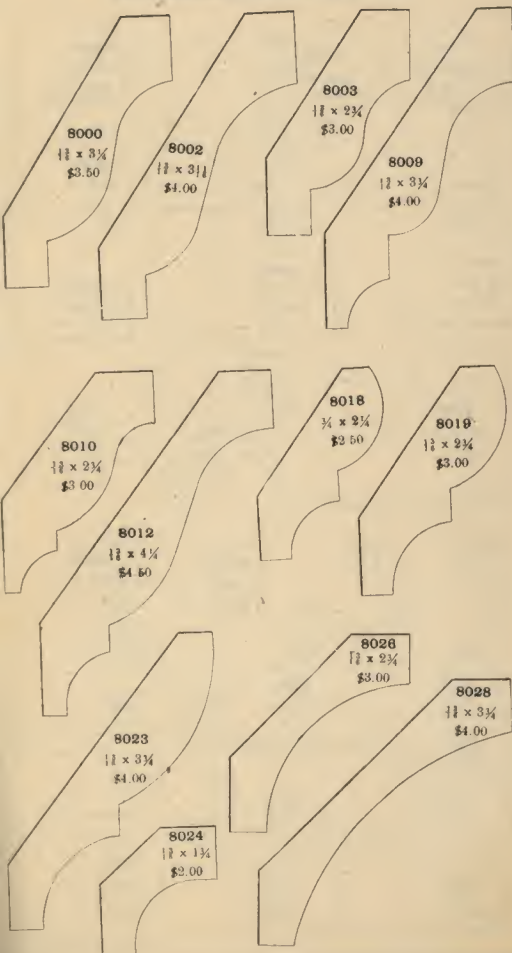

It occupies a floor space of 3 x 6 feet; weighs a little over 100 pounds and separates into eight parts without removing a bolt or screw. By purchasing a "**Simplex**" Settee you have an up-to-date swing that occupies only one-third the space of the old style, and one which can be moved without the slightest exertion.
